

# Slide Wood service program

## CARE

## Dear clients,

Due to frequent requests for carefree post-warranty care, we would like to introduce our new Slide Wood CARE service program.

The aim of this program is to ensure the best possible functionality of your roofing and to prevent any problems caused by the ongoing wear and tear of your pool roofing.

Our expert technician will inspect the entire roof, check all screws, bolts, locks, rubber seals, the condition of wooden or WPC boards, test the cover's movement, and perform a comprehensive analysis based on all the information gathered.

If the technician discovers a defect, they will explain its nature to you on site and recommend further steps to remedy it. Before any service work is carried out, you will always be consulted and the necessary work will be agreed upon.

If you are interested in our service program, please contact us to book an appointment:  
[servis@slidewood.cz](mailto:servis@slidewood.cz) or +420 725 101 621

We appreciate your initial trust and look forward to serving you in the future.

Sincerely,

*Team Slide Wood*
